Instruction Manuals
1999-2006 GM 1500 Truck 2” Drop Hangers
1999 – 2006 GM 1500 Truck 2" Drop Hangers

These hangers will replace the factory hangers on your truck that are attached to the FRONT of the leaf spring (end closest to the engine).

PLEASE DO NOT ATTEMPT TO INSTALL THESE HANGERS TO THE REAR END OF THE LEAF SPRING WHERE SHACKLES ARE ATTACHED, THEY WILL NOT FIT.

Pictured below (left side picture) is the factory hanger mounted to the passenger side of the truck. The stock hanger has 6 rivets that hold it to the trucks frame. Our hanger only needs 4 of these rivets to hold it in place. Please use the holes marked 4 and 5 towards the front of the truck and 2 and 3 towards the rear of the truck.
