Chevy 6 Lug Shock Extenders- Installation Instructions
(For some vehicles it is easier to install the brackets with the shock in the vehicle)

1 - Remove the lower shock bolt from the lower control arm.

2 - Turn the shock 90 degrees.

3 - Using the bolt provided, place the shock extender into the shock mount.

4 - Using the factory bolt, install the shock extender onto the lower control arm.

5 - Tighten the upper shock mount.
