Single compressor wiring diagram

Note: Use thread sealant for proper installation. Teflon tape is not recommended. Properly sealed, recommended torque is 12 to 15 ft. lbs.

*IMPORTANT*
Do not disassemble. Do not attempt repairs or modifications

This compressor will become very HOT during and immediately after use. Do not touch any part of this compressor with bare hands, during and immediately after use.

This air compressor is equipped with an Automatic Reset Thermal Protector, and can automatically restart after the thermal protector resets. Always cut off power source when thermal protector becomes activated.

WIRE SIZES RECOMMENDED
Power wire from battery - 8 gauge minimum
